FAQ

Azara Bedroom Collection

Azara Bedroom Collection

Azara features modern architectural lines with accents in exotic Tiger bamboo. Shown in Sable finish with accents in natural exotic Tiger. Exotic Tiger combines the light and dark material, creating a unique and beautifully striped grain with continuous colors throughout. No two pieces are exactly alike. Greenington's tough metal to metal connecting hardware withstands multiple bed assemblies with ease.

- Crafted in 100% solid bamboo
- No plywood, particle board, or MDF
- Earth friendly, sustainable resource
- Hand applied rich Sable finish
- Exotic Tiger bamboo accents
- 20% harder than Red Oak
- Fully assembled nightstand and chests
- Beautifully finished all the way around
- Solid bamboo drawer box with English dovetail
- Undermount, soft closing drawer glides
- Solid bamboo slat system, no box spring needed
- Tough metal to metal connecting hardware

Hanna Dining Collection

Wheat

Crafted in solid bamboo, the Hanna dining table makes a statement with a beveled rectangular tabletop on two dynamic shaped pedestals, while the Hanna chair blends sculptural shape and fine craftsmanship into a graceful and airy form.

Sustainable and earth friendly, Wheat is not a surface stain, the color is the result of an innovative process using heat, steam, and pressure to transform the solid bamboo material into Wheat's light color.

- Crafted in 100% solid bamboo
- No plywood, particle board, or MDF
- Eco-friendly, sustainable resource
- 20% harder than Red Oak
- Chairs professionally assembled

Greenington Product Features

For over 20 years Greenington's factory has been developing and manufacturing high quality bamboo products. As new technologies continue to emerge, Greenington will continue to stay on the cutting edge to maintain its role as an industry leader by providing its customers with innovative designs made of the finest materials.

- Fully assembled case goods
- Beautifully finished all around
- 5 sided drawer box with English dovetail
- Under mount, soft closing drawer glides
- Fully assembled chairs and stools
- Cable assisted ball bearing table glides

Greenington furniture is manufactured using only mature Moso bamboo at least 5 years old. This ensures maximum strength, hardness, and stability for all our products. The Amber, Ruby, Caramelized, Exotic Tiger, and Exotic bamboo materials are achieved through the process of caramelizing the sugars in the bamboo with heat, steam, and pressure. Variations in grain and color enrich the natural beauty of bamboo furniture.

- Doors - soft closing swing doors
- European slat system, no box spring needed
- Solid Moso bamboo slats
- Easy to use connected slats

07.2023

Why Choose Bamboo

We harvest one of Earth's most sustainable and fastest growing plants straight from bamboo forests in China to design naturally beautiful furniture in a process that is environmentally friendly and helps sustain our planet.

- Bamboo is one of the earth's fastest growing and rapidly renewable plants.
- Bamboo is a grass which matures in 5 years or less.
- Bamboo requires no irrigation, pesticides, or fertilization.
- Bamboo is 20 % harder than Red Oak.
- Bamboo is one of the best plants on Earth to sequester carbon.
- Bamboo releases approximately 35% more oxygen into the atmosphere than an equivalent stand of trees.

Greenington Fine Bamboo Furniture

information

Environmentally Sustainable: Bamboo is one of the earth's fastest growing plants, a grass that grows to maturity in 5 years or less. Our bamboo is harvested from the managed forests of a fully sustainable, environmentally friendly and rapidly growing renewable resource.

Bamboo reduces the atmospheric concentration of carbon dioxide, which is the main contributor to reduce global warming. Bamboo releases about 35% more oxygen than equivalent stands of trees making it one of the best plants on earth to sequester carbon.

Our bamboo material has been treated and kiln dried to a specific moisture content, then put through our special manufacturing process to produce the bamboo materials we use. The VOC emissions of the adhesive used in manufacturing our products are well below allowable European, US and California standards.

Advantages

of our furniture

Hardness: Greenington furniture uses only mature Moso bamboo that is at least 5 years old ensuring that our furniture possesses strength, hardness and stability. Our Classic bamboo is 20% harder than Oak, and our Exotic bamboo is 100% harder than Red Oak.

High Quality: From processing the raw bamboo material into solid stock and panels, we make the final product in our ISO 9001 and ISO 14001 certified factories under tight quality control.

Variety of Choices: We offer a wide selection within our Classic Bamboo Collections, featuring our standard laminated panels in a natural Amber, Ruby, Caramelized, and Wheat finishes, along with Caviar, Black Walnut and Sable stain finishes.

Leadership: With over 20 years experience manufacturing bamboo products, Greenington is the leading company in mid to high end bamboo furniture production. Our processes are innovative, using the latest developed technologies to create new product lines.

Frequently Asked Questions

about your new bamboo furniture

What kind of bamboo is used in Greenington Furniture?

There are more than 1200 bamboo species throughout the world. Greenington only uses mature Moso bamboo (*Phyllostachys pubescens*), valued for its hardness, durability and stability. And pandas do not feed on Moso bamboo, which is extremely important.

Is there off-gassing to be concerned about with the adhesives used?

The adhesives used in manufacturing our products have very low off-gas emissions. The formaldehyde gas levels are well below the European, US, and including California VOC standards.

What is the difference between Classic Bamboo and Exotic Bamboo?

Our Classic Bamboo material is laminated from square edged bamboo slats under specific pressure and temperature into stock and panel material. (20% harder than Oak.) Our Exotic Bamboo material is made by fusing thin bamboo strips under very high pressure into our stock and panel material. (100% harder than Red Oak.)

Amber, Ruby, and Wheat Bamboo add an entire new look to our furniture.

These color choices are created through a natural process that works in harmony with the bamboo. Amber and Ruby are not stain finishes, simply an innovation using earth friendly heat, steam, and pressure to transform the solid bamboo material into vibrant colors. Variations are expected in grain and color and enrich the natural beauty of bamboo furniture.

Is your furniture 100% bamboo?

Yes, all Greenington bamboo furniture is made of 100% bamboo with no added filler, fiberboard, MDF or other materials.

Where are your products made?

All Greenington bamboo furniture is made in our ISO 9001 Quality Management and ISO 14001 Environment Management certified factory in China.

How do I care for and maintain the bamboo furniture?

Periodic cleaning can be done using a soft cloth and a gentle cleaner designed for wood furniture. Please visit www.greenington.com for more detailed instructions.
