Craftsmanship...

is excellence, beauty, and durability. The ability to create elegant and high-quality that delivers value. Checking details and making sure each piece performs what it was designed to do.

go with bamboo...
live with sustainability

0%

No waste. Greenington utilizes the entire bamboo culm wasting nothing.

10%

Moso bamboo matures in 5 years, just 10% of the time for hardwood, which can take up to 40-60 years.

100%

Greenington is crafted in 100% bamboo, no plywood, particle board, or veneers are used.

DREAM GREEN

Gentle curves and sleek contours...

WINE & DINE

Balance

What I dream of is an art of balance.

OUTDOOR

Inspired by nature, bamboo furniture that can be placed anywhere, regardless of season and setting.

COMO DINING

Crafted in sustainable bamboo and designed for a crowd.

Why Bamboo...

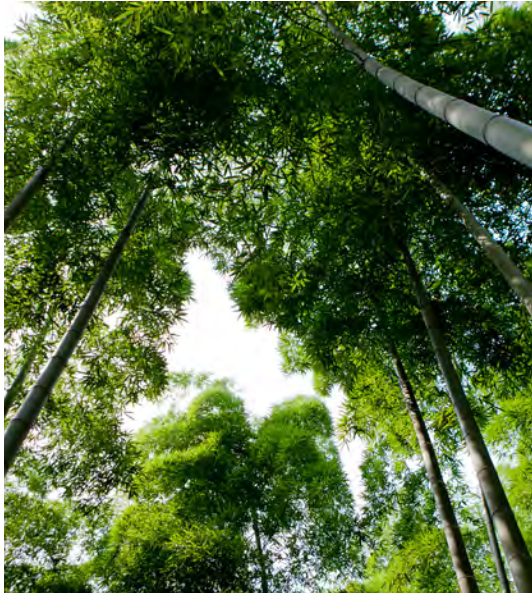

One of the best plants on Earth to sequester carbon, bamboo releases approximately 35% more oxygen into the atmosphere than an equivalent stand of trees. Unlike harvested trees which need to be replanted, after harvest, the bamboo rhizomes live to produce more shoots. Because it lives on, its carbon sink is not released like a tree after it is cut down.

For over 20 years, Greenington solid bamboo products have been sustainable. Sustainability is an inherent characteristic of our raw material, Moso bamboo, one of the earth's most rapidly renewable and sustainable building and manufacturing resources.

Each bamboo culm is individually selected by the local farmer and harvested by hand, preserving the eco-system of the native bamboo forest, and leaving the bamboo root system intact from which new bamboo shoots will emerge. Greenington avoids the practice of clear cutting, a method often employed in the timber lumber industry involving the removal of large areas of standing trees.

Greenington has always been focused on sustainability and is practiced in both product procurement and production processes, to continual factory level improvements, ensuring the manufacturing efficiency and quality of Greenington finished products.

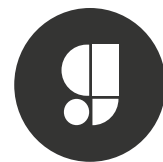

Greenington is a sustainable furniture company creating beautiful and high-quality furniture using one of earth's most sustainable resources, bamboo. Focused on quality, Greenington cuts no corners, staying true to their sustainable mission by following strict international standard guidelines, and having a zero-waste manufacturing process.

Greenington's founder was manufacturing high quality bamboo products for over 20 years before he entered the business of creating a line of high quality solid bamboo furniture in 2004. His expertise in working with this rapidly renewable resource has elevated Greenington to the top of the industry; recognizable for its enduring beauty, style and exceptional quality.
